In this game you're basically Iron Man, but you're always running on empty. And you can't ever fill 'er up. You have just enough energy to get you to the next spot. That's if you planned and executed your path there correctly, otherwise you'll fall to your death or run into a trap where you'll die and also fall to your death. There's a lot of dying involved.

And you have these robots making fun of you along the way. I found the robot characters to be hysterical. Definitely, took some material from Portal, but hey, nothing new under the sun, right?

Well, except for this game. Because it is amazingly fun. I love it. VR platformer done right. So much polish and it's only in EA. I look forward to seeing where this game will end up when it's a totally finished product. This is as a must buy if you like puzzle platformers or VR. Even if you don't, you may after trying this game.

Rate 9/10 ... would put thruster implants in my hands and boost around dangerous trap areas again for science!. Warning: As with all KF's overpriced DLCs, only get it on a sale. (Also, this'll be a short review, since its just a character and all)

Out of all the characters, both the ones packaged with the game and purchasable ones, plus unlockables, I've wanted Mrs. Foster the most. She looked good. Really good. And that convinced me. I expected her voice to be just as good as the males'. Boy, was I wroong...And no, the age in her voice isn't my issue here. It's whoever wrote her script. She is so serious in comparison to the male voices, so much more that it kind of disappoints me. I'll still use her, but the overdone, yet funny cockney slang was so good for me I actually miss it now. Oh well, at least I'll hear others say them.

Also, another personal issue I've had with her is that the FPS arms are actually white long sleeves (still has fingerless gloves though don't worry), just look at that. Kind of annoys me. Oh well.

So, in short, if you want her for her general looks the most out of all the characters, get her.

If either issues I've had bothers you, then don't. I'm serious.

She is good overall, though. I just really miss "WAKE UP YOU PILLOCK!".... Well... I got the chocolate outfit... However, the upside down hearts, :(Not liking that... The overall look looks a bit depressing, since it could have been a lot better like the mud character in the game or even the slime character in the game. This sadly wasn't the case. I would recommend this to anyone that likes the slime, mud, goo style, but sadly this is lacking for me on this outfit.. this game should not even be on Steam.. This DLC alone costs about 1/5 of the full game

10\$ for the loli version a god-killing alien from another galaxy sent to destroy civilization (who also happens to be Attila the Hun), is it worth it?

Hell yeah it is. You really shouldn't have to re-write a game just to play.

I am so confused menus just disappear and leave you stranded, can't start from scratch?. Game is exactly what it says it is. A city builder, all it needs is some polishing up and some bugs fixed.

The devs are great and respond to almost all the messages sent to them in the forums.

Gameplay wise it has some issues with framerate drops when looking in dense forest areas and things floating when building on a mountain. This game is far from finished but it has potential that i think will come to fruition once they have polished all the features.

. This route is a fantastic route.

It's incredibly detailed and very worth the \$39.99 if you can get it on the sale then great!

It's a fantastic route with beautiful locales, realistic sounds beautiful scenery one of the best routes Dovetail Games has actually ever made so all in all if you are starting your collection or expanding it then this route is a perfect buy!

I would certainly recommend it especially for the \$32.99 price on the sale at the moment!

Love it i would give it 5* out of 5

p.s this route is not that graphically demanding so it won't put your pc under too much strain which is a relief unlike some of the newer routes. What are you looking at?! BUY IT !!! I had high hopes this game would be the VR answer to Cho Chabudai Gaeshi (Japanese table flip arcade game, look it up) but "Flip the Table" didn't even come close.. Props to the makers. I picked it up on sale today. Had it in my wish list for a while as I've heard good things but couldn't really see how tennis or ping pong would be all that great.

I was wrong, the physics are really quite incredible. I can tell there is obviously some assist in action to make things a little less realistic and frustrating and 10X more fun. Great job. I can't decide which I like better. Probably ping pong since I grew up playing it and it hits close to home.. Solid product, and great deal at today's prices. Plenty of detail and character, if lacking in traffic in QD (but to be expected at this age). Recommend wholeheartedly.. Interesting style of game. Did enjoy and would like to see if this goes further.. Fairly simple game, definitely not over price. They introduce you to each new concept and tool slowly so you don't have to worry about getting lost. Unfortunately it's simply boring. Each level only appears to have one "proper" way to complete. I say proper because levels eventually have bonus objectives but those are basically just for you to try for a "perfect" run through. If you're really curious you can pick it up, and not worry since it's so cheap.. Think this game good?

Think again.
